

# US#1 - Create Task

*As a ToDo App user*

*I should be able to create a task*

*So I can manage my tasks*

## Acceptance Criteria:

- The user should always see the 'My Tasks' link on the NavBar
  - Clicking this link will redirect the user to a page with all the created tasks so far
- The user should see a message on the top part saying that list belongs to the logged user:
  - eg.: If the logged user name is John, then the displayed message should be **'Hey John, this is your todo list for today:'**
- The user should be able to enter a new task by hitting enter or clicking on the add task button.
- The task should require at least three characters so the user can enter it.
- The task can't have more than 250 characters.
- When added, the task should be appended on the list of created tasks.

## US#2 - Create SubTask

*As a ToDo App user*

*I should be able to create a subtask*

*So I can break down my tasks in smaller pieces*

### Acceptance Criteria:

- The user should see a button labeled as '**Manage Subtasks**'
- This button should have the number of subtasks created for that tasks
- Clicking this button opens up a modal dialog
  - This popup should have a read only field with the task ID and the task description
  - There should be a form so you can enter the SubTask Description (250 characters) and SubTask due date (MM/dd/yyyy format)
  - The user should click on the add button to add a new Subtask
  - The Task Description and Due Date are required fields
  - Subtasks that were added should be appended on the bottom part of the modal dialog
